Medication Assistant

The medication assistant program is a 100 hour training course that prepares students to administer routine medications to patients in a variety of healthcare settings. Medication Assistants practice under the supervision of licensed nurses. Upon successful completion students will be eligible to apply for the Medication Assistant Certification Exam (MACE).

Course Topics

* Basic competencies and safety for medication provision
* Basic procedures for medication provision
* Skills labs on the methods of medication provision
* Medication and the elderly
* Accurately recording medication provision

The scope of practice for medication assistants in the state of Alabama is regulated by the Alabama Board of Nursing (ABN).

To be eligible for the class, a high school diploma, or GED, drug screen and background check is required. Certified Nursing Assistant, or clinical experience, is helpful but not required.

Tuition
$1,000 per person
(includes textbook)

**Additional costs include background check, immunizations, application and exam fee.*
